Financial Times – The Americas' Fastest Growing Companies 2024

Dear Vilione,

On behalf of the Financial Times and Statista, we're glad to inform you that **Enviro-Safe Resource Recovery** has been distinguished as part of **The Americas' Fastest Growing Companies 2024**. Congratulations!

Through this ranking, we wanted to identify the companies that contribute most heavily to economic growth. The 500 companies with the strongest revenue growth between the years 2019 and 2022 will be featured on the FT.com website on April 4th, 2024. Your company stands out in a very dynamic region with millions of active companies.

A good track record in the past is not necessarily a recipe for future success, yet our research for this ranking indicates that you have what is essential for a company: generic growth that is accompanied by substance and sustainability.

We wanted to give you an opportunity to convey this message to your stakeholders by using The Americas' Fastest Growing Companies logo. As you further expand, our official seal might serve you well by gaining the attention and trust of talent, clients, investors or business partners. Please consult the enclosed documents for further details about licensing the logo for your marketing, recruitment, and communication needs.

We invite you to advertise in the Financial Times special report, which could be used to attract stakeholders and investors as well as promote your company to the global business elite. The listed companies are also able to take advantage of discounted media rates. For further information on this branding opportunity, please refer to the advertising booking sheet attached.

Once again, congratulations on this outstanding achievement and all the best going forward.

For information about the Financial Times award, licensing details, as well as the methodology used to create the rankings, please contact:
